

## HxLogic

### MODULES

- Medical Cost
- Self-Funded
- Accountable Care
- All Payer Claims Database

HealthAxis offers analytics solutions that empower decision-makers to take action. HxLogic transforms data delivered through pre-built, self-service and predictive analytics capabilities.

Our insights reduce costs, improve outcomes and increase operational efficiencies.

### BENEFITS

#### Accelerate

Accelerate the deployment of your data warehouse with prebuilt rules and models.

#### Save

Lower risk and cost of ownership. Reduce the burden on IT resources with self service capabilities.

#### Identify

Improve decision making with better visibility into healthcare expense and cost management.

HxLogic is a powerful pre-built data warehouse and analytics solution that provides healthcare organizations with near real time information to fundamental subjects like Claims, Members, Providers, Product, Medical informatics, General Ledger and Standardized Code Sets. It integrates all types of structured and unstructured data, including medical, pharmacy, and dental claims, as well as information about member eligibility, benefit design, providers, enrollment, public databases, demographics, websites and member experience outlets.

HxVision enables executives, managers and frontline employees to make better decisions, take action and correct problems before they effect quality of care.

### KEY FEATURES:

- Over 175 Reports Measuring 750+ Metrics
- Pre-built Data Warehouse, Data Models, ETL Workflows and Analytics
- Automatically Integrate Data from Multiple Sources
