

POWERING INFORMED BUSINESS DECISIONS

MANAGING RISK IS MORE MANAGEABLE WITH DMS.

Data-driven decisions are empowered ones. Businesses today need to rely on efficient and accurate access to credit bureaus and specialty data sources to minimize risk.

Leveraging CreditBrowser®, you can easily access multiple data sources using a standard Internet browser. A flexible and customizable interface enhances the user experience, requires minimal training, and provides faster access to the information you need.

CreditBrowser delivers:

- Access to specialized data providers
- Increased operational efficiency
- Improved risk management processes
- Effective management of bureau preferences
- Masking of sensitive data
- Deduped and merged reports

Streamlined navigation and simplified administration — CreditBrowser is designed with productivity in mind

IMPROVING THE EFFICIENCY OF YOUR DECISIONS

Eliminating the need for additional software, CreditBrowser enables report access via a standard Internet browser for an intuitive experience. Delivery of complete, accurate and easy-to-read credit reports reduces errors and improves readability of business-critical information. Security is self-administered and includes controlling access to specific report types, data sources, IP ranges, time of day/week, and other guidelines set by the administrator.

User-Centric Functionality

Improved User Experience

Streamlined navigation provides faster access to the information users need, while enhanced default options save time by eliminating keystrokes.

Effective Management Reports

Reports that include activity reporting by user, data source, and time parameters offer greater flexibility to meet auditing needs.

Simplified Administration

Administrative features enable a greater level of control through defined authority levels that simplify routine maintenance tasks and the administration of user options.

Up-to-Date Security Features

User controls are easily implemented and managed, and are paired with security processes that ensure client information is safe.

About Digital Matrix Systems

Founded in 1982, DMS is an international risk management solution provider that helps clients leverage the power of data to make better-informed business decisions. Through an integrated product suite, DMS delivers secure access to consumer and commercial credit bureaus, as well as specialty data providers.

CreditBrowser supports many essential business activities:

- Enhanced underwriting
- Human Resources
- Skip tracing
- Regulatory review
- Collections
- Balance transfer
- Credit line increases
- Fraud reviews

Data Made Simple.

The DMS Credit Report Format leveraged in CreditBrowser displays data from the credit bureaus and other data sources in an easy-to-read format. Visual risk cues and consistent formatting for all data sources help streamline the decisioning process and improve the efficiency of your staff.
