

THE ENDLESS PURSUIT OF BETTER TRADING

Adroit Trading Technologies – Our Story

For the last two decades, we have been responsible for critical investment and technology functions at top buy-side firms. In those years, we were frustrated by vendor solutions that could not accomplish basic investment objectives, even after years of integration and enhancements.

With that experience in mind, we built the ideal buy-side O/E/M system for complex OTC products.

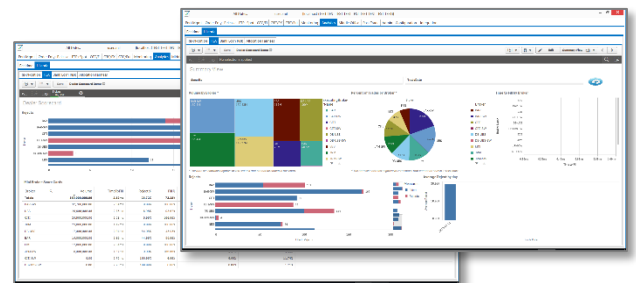

Alta Investment Platform – End-to-end Buy-side O/E/M for OTC Markets

- Use the right tool for the job: Purpose built for the buy-side to improve execution and streamline traders' jobs for the OTC markets
- The only platform that aggregates streaming, RFQ, and voice liquidity in OTC markets (Swaps, FX, FI)
- End-to-end solution that handles the most complex use cases and fund structures
- Quick and flexible to deploy, Alta integrates to your technology stack using plug-and-play components
- A cornerstone of trading at leading funds known for their scale and depth in OTC markets

KEY BENEFITS

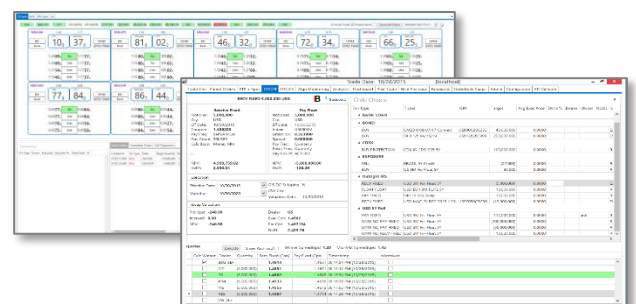

Improve execution and reduce transaction costs

- Smart Order Router
- Real-time, Consolidated Order Book with extensive connectivity
- Trade Optimizer
- Built-in Trade Cost Analytics

Enable traders to make better decisions more quickly

- Live valuation of trades including complex packages
- Intuitive User Interface: Contextual, guides traders through workflow
- Minimal data entry, fat-finger input checks
- Automatically handles complex fund structures
- Out-of-the-box workflow rules for compliance and efficient execution
- Single click to other systems (e.g., Bloomberg functions)

Rapid integration and flexibility

- Weeks to first trade (vs. many months)
- Integration framework that works with your current APIs
- Modular design accommodates use of existing systems
- Library of interface adapters allow for easy integration
