

# Business Intelligence

## Powerful Data Insight and Data Driven Decisioning Built Specifically for Insurance

**INSURERS REALIZE** that traditional reporting capabilities are no longer sufficient to meet the demands of executive's for operational analysis. Access to current data has to be available to the people who need it to make important data driven decisions quickly to respond to changes in the market or unforeseen events.

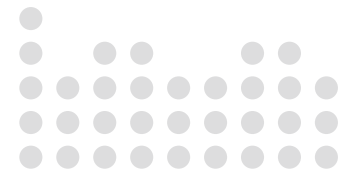

Business Intelligence and Analytics provide the opportunity to aggregate data both internally and externally providing the ability to slice, drill into and visualize data like never before. All without relying on IT or others in the organization to prepare the data. Unlocking data provides agility, power and insight for the business users of today.

### FEATURES
