

B2 ChannelDoc Generator

Automated Electronic Banking Channel
Documentation Portal

The Next-Generation Solution for Document Generation

Part of B2 Group's revolutionary Channel Suite, the B2 ChannelTest Generator provides banks with powerful capabilities to generate and maintain client facing documentation within a central, multi-version repository.

ChannelDoc Brings Rapid Benefits. With ChannelDoc you can:

- Empower clients to generate and maintain their own documentation
- Dramatically reduce on-boarding time or time-to-market for new products through faster creation and maintenance of documents
- Provide the same customer experience for large and small clients alike
- Remove reliance on your internal IT infrastructure through:
 - fully hosted service accessible to banks and clients
 - easy to use browser based screens accessible by all
- Set no limits to usage (users, clients, documents)
- Treat each client as unique, able to tailor their own specific documentation
- Cater for individual market requirements and variations

Unparalleled functionality means client specific documentation first-time, every time

ChannelDoc Generator, built using B2 Group's many years of experience on-boarding clients for the world's largest banks, delivers a breadth of functionality that covers all aspects of document generation required by today's international transaction banks.

ChannelDoc's Unique Array of Features Includes:

- Generation of generic and transaction specific integration documents for a structured transaction file formats
- Bank controls access rights to:
 - empower clients to import different documents or data structures for easy maintenance
 - set client or market specific rules
 - set client specific instruction and statement formats.
- Management of all client and market documentation in a central multi-version repository
- Full audit trail of client usage
- Multi-media output (Word, PDF, Excel, CSV, XML schema ...)
- Export of structured schemes for import into other systems (including B2 ChannelTest Generator for fully integrated end-to-end use of B2 Channel Suite)
- Supports ISO20022 and other industry formats
