

## A Complete Hedge Fund Solution

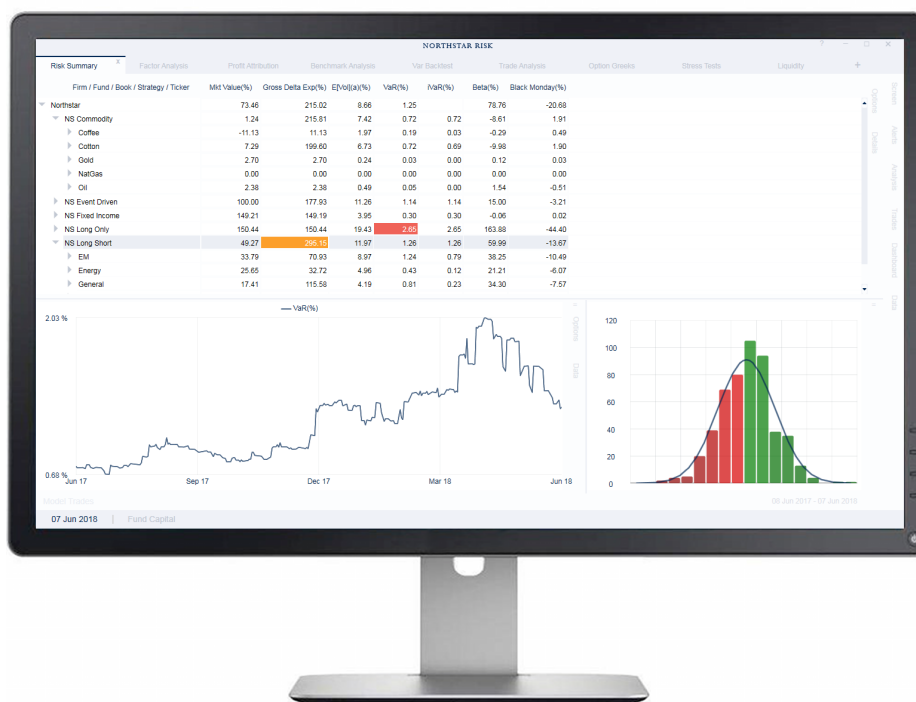

Based on years of experience working in the hedge fund industry, Northstar provides a complete solution for today's hedge funds: market risk, performance analysis, real-time alerts, portfolio construction, liquidity, investor reporting, and model validation, all in one integrated platform.

## Not Just Software

Northstar is not just software, it is a service.

Other vendors require you to build and maintain complex systems to import, export and store data. At Northstar, our experts will fully integrate your back-office systems with our risk and performance platform. Each day, your data is automatically loaded, crosschecked, and stored in your own private Northstar cloud.

Northstar is faster, easier to maintain and more accurate, saving you time and money.

# More of What Hedge Funds Want

Compared to the competition, Northstar offers more features, all in one seamless, fully-integrated platform. This integration saves time, reduces operational risk, and ensures consistent reporting.
