

PDHI Wellness Platform

The platform supports the delivery of comprehensive, private-labeled workplace wellness and population health management programs. The platform provides fully integrated wellness solutions configured to match your program design.

Portal Solutions

Personalized dashboards with custom branding and program design. Mix and match our health improvement tools including health assessments, self-management tools, challenges, and wellness events. Deliver a one-stop solution by integrating third-party applications.

Health Coaching System

Application streamlines the administration of your health coaching programs. Automates stratification and eligibility for coaching. Supports online scheduling, secure messaging with participants, and goal setting.

Incentive Management

Custom incentive programs based on participation, results, and qualifying activities. Track rewards, reasonable alternatives, and exemptions.

Biometrics Management

System to support data collection and consideration from multiple sources and screening vendors. Participants can schedule appointments at on-site screening events and view real-time results on their dashboard.

Program Administration

Extensive self-service tools and reports to efficiently manage programs and data exchanged with third-party applications.
