

Simple and Easy.

*“My Bank Center
is so convenient”*

At Zenmonics, we know self-service interactions should make your life (and your customers’ lives) easier. That’s why our channelUNITED® Kiosk solution does the heavy lifting—so you don’t have to. Our solution is the only market solution that provides both a kiosk and integrated channelUNITED® Banker tablet application to provide personalized Sales, Servicing and Origination across devices and all on your branch network. Our hardware independent solution can be deployed on any automated teller machine, allowing you to migrate more advanced transactions as part of your branch transformation – for both staffed and nonstaffed locations.

Challenge

Dated kiosk solutions offer the illusion of automation without the follow-through. Bad kiosk solutions rely on ATM network switches or manual rekeying of data, limiting the transaction sets and increasing costs.

Solution

You need a fully integrated platform that can provide real-time financial and sales & service capabilities on the kiosk. By running on your branch network, you can remove the limitations of dated financial networks

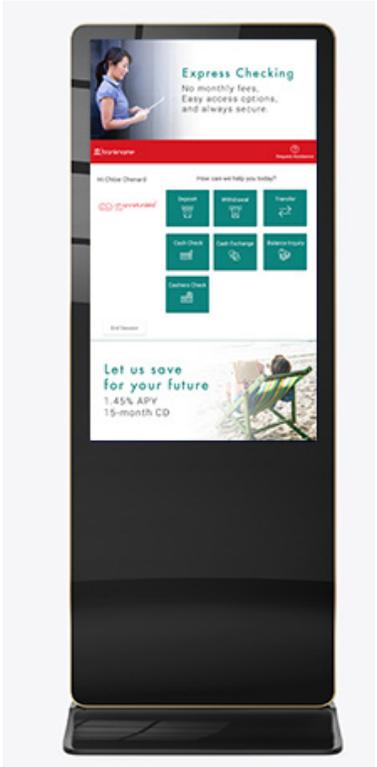

Platform Highlights

- Cardless banking and Pre-staged transaction support
- Ability to support both straight-through processing or assisted transactions
- Paired Banker tablet with real-time integration to all customer and account information for personalized engagement
- Options to deploy to your legacy teller platform or channelUNITED® Teller
- Configurable overrides, holds, aggregation and other compliance processing
- Deployable on leading hardware providers
