

Insurance Solution Framework (ISF) - Non-Life Insurance

NON-LIFE INSURANCE (ISF Non-Life)

Non-life insurance supports personal, commercial and specialized lines of business. It processes straight through, is customer-centric, and flexible in managing varied channels.

The common business functions for Non-Life Insurance, such as product configuration, new business, renewal, underwriting, policy servicing, Reinsurance and claims spans across Non-Life Individual and Commercial lines of business described above.

The base common functions such as channel management, channel compensation, collections, payments and subsidiary ledgers are handled in building blocks to give you the flexibility of changing business arrangements.

The entire profile of your customer is kept in one place so that you can assess total risks, up-sell and cross-sell to your customers. The channel profiles are also kept in one place so that you can manage and compensate the entire portfolio of your channels.
