

## Salmon Treasurer

Salmon Treasurer provides extended treasury management functionality enabling you to centralise or decentralise treasury operations and manage unlimited accounts, facilities, books, funds, dealers and companies. By automating the majority of treasury management processes, Salmon Treasurer effectively eliminates the need for spreadsheets and allows you to focus on adding value in other areas.

The system supports all currencies, facilitates trades and managing these trades, across an extensive range of financial instruments providing real time revaluation of all deals and positions while interfacing with a wide variety of external and internal systems.

Salmon Software provides a world-class treasury management system at a very affordable price.

Our system is suited to single, double and triple digit user numbers and benefits a variety of business types and sizes.
