Triton®

Shrink the world to expand your opportunities

Imagine trading the way you want, across the world, knowing you're achieving the best possible execution every time. Triton®—the global execution management system from ITG—gives you the ability to determine the right strategy to efficiently locate quality liquidity, whether you're trading equities, derivatives, single stocks, or lists.*

Triton connects you directly to brokers around the world and provides easy-to-use tools to help you achieve best execution. By helping you locate large

blocks of liquidity in multiple global markets simultaneously, Triton removes international roadblocks that once interfered with certain trading strategies. So no matter where or how you choose to trade, you can maintain your strategy and process your executions with efficiency and speed.

Triton's simple interface is customizable and intuitive. As Triton is broker neutral, you have complete freedom to use ITG's tools—including capabilities that can help you access quality liquidity, trade efficiently, and measure costs to boost performance—as well as those from other brokers.

Insightful Level II data

View available global liquidity across exchanges as well as the full depth of books from ECNs and MTFs.

KNOW HOW YOUR TRADE WILL EXECUTE BEFORE YOU BEGIN

Take advantage of the market-leading pre-trade and real-time analytics from ITG Smart Trading Analytics, or import analytics from other providers. View estimated pre-trade costs and receive alerts when market conditions change. Conduct "what if" analyses using various benchmarks. Use ITG Smart Trading Analytics to help identify daily outliers, analyze the implications of different execution strategies, and suggest efficient execution methods. Pre-trade cost estimates identify the optimal balance between market impact and opportunity costs.

A TRITON FOR EVERY TRADER

The industry's leading broker-neutral, multi-asset EMS trades the way you do.

- **Triton®** For global multi-asset portfolio trading
- **Triton® Black** For active single-stock and options trading
- **Triton® Derivatives** For low latency derivatives trading via GUI or API

ACCESS GLOBAL LIQUIDITY

Trade freely with preferred brokers and their algorithms. Take advantage of POSIT Alert® for indications-based crossing, ITG Algorithms® and the aggregated dark liquidity of POSIT Marketplace®. Expand connectivity to more than 450 global brokers through the ITG Net® communications network.

ACTIVELY TRADE SINGLE STOCKS

View available global liquidity across exchanges, and access the full depth of books from ECNs and MTFs. Set "hot" keys and use dynamic charts to monitor real-time trade progress.

TRADE EQUITIES AND THEIR DERIVATIVES

Simultaneously trade equities and equity derivatives*, with order entry and monitoring screens tailored to the nuances of each instrument. Hedge your bets or execute advanced trading strategies.

High-quality block crossing

MANAGE LISTS EFFICIENTLY

Streamline basket trading by grouping, viewing, and aggregating entries and lists. Trade one name across multiple lists as a single entry and apply one average price. Share lists with other desks or pass next-day orders to regional desks. You can choose to create trade lists on the fly, let Triton sweep your OMS, use the import wizard, or load lists with a customized script.

POSIT Alert® automatically delivers block crossing opportunities to your Triton desktop. Interact directly with byside blotter liquidity as well as order flow in POSIT®, MATCH NowSM and ITG Algorithms®.

Intuitive customization

Set your work space the way you want it: slice and dice list views, position windows and toolbars anywhere, conditionally color code fields, create your own formula columns, monitor performance across multiple benchmarks, see or take over other traders' lists, and much more.

INDUSTRY RECOGNITION AND LEADERSHIP POSITION

Since 2003, Triton has set the industry standard in execution management:

2014 Best Equities Trading Platform-Broker—Wall Street Letter

2013/2011 Best Execution Management System—Asian Investor Service Provider Awards

2012 Best Global Deployment—American Financial technology Awards

2011 #1 EMS Among Long-only Asset Managers—TABB Group

2011 Best EMS—Forefactor Inc., Canada

2011/2010 Buyside Trading System of the Year—The Asian Banker Markets & Exchanges Awards

2010/2009 #1 Important Execution Management System for Electronic Trades—Greenwich Associates

CHECK COSTS IN REAL-TIME

The Smart Destination Analyzer (part of ITG Smart Trading Analytics, embedded in Triton) reveals historical TCA-based destination performance at the point of trade. Subject to order specific values and dynamic intraday stock-specific volume and volatility measures, cost-based performance results are pulled from the industry-leading ITG Peer Universe.

MONITOR INTERNAL ACTIVITY

View all trading activity across multiple users from any desktop. Group lists by various identifiers, assign orders and portfolios, share real-time trade reports, and take over orders from other traders.

MAKE SMARTER TRADE DECISIONS

Triton runs ITG Smart Trading Analytics to uncover expected costs and risks across multiple trading strategies before you trade. This unique, intraday analysis allows you to act upon real-time information so you can easily adjust your trading decisions as market conditions change.

TRADE THE WAY YOU WANT

Using Triton’s best-in-class technology, you can link to other trading systems and integrate Triton with external applications and proprietary algorithms. Triton’s open architecture and Application Protocol Interface allows for virtually unlimited customization.

ANALYZE TRANSACTION COSTS

Use ITG TCA® to run post-trade transaction cost analysis or assess trading performance and implicit costs. Choose from a wide selection of standard and customized reports.

DEVELOP INFORMED STRATEGIES

Take the guesswork out of strategy selection with input from ITG TCA. Our experienced trading strategy specialists will help you interpret trading results, so you can proactively adjust your strategies to improve performance.

Integrated ITG Smart Trading Analytics

Smart Destination Analyzer reveals recent performance results by algo strategy and broker for orders similar to those in your blotter, informing your trading strategy decisions based real-time market conditions and historical outcomes.

Determine whether current trade conditions are favorable. Smart Market Indicators classify current market conditions with respect to historic norms.

Track performance when it matters, in real-time. Analyze a single name or an entire tradelist against a variety of benchmarks.

REDUCE CLEARING COSTS

Keeping a check on all costs in the investment process is important to preserving alpha. ITG Single Ticket Clearing Service helps you reduce clearing costs by consolidating trade tickets.

WITH ITG, SEE WHAT OTHERS CANNOT

We help you preserve alpha in today's complex markets, with:

- **Independent execution consulting and fact-based guidance**
ITG's deep trading expertise across the globe can help you optimize workflows, align execution strategies, and analyze transaction costs
- **Fully transparent execution**
ITG Algorithms® provide complete transparency on the execution quality of each trade
- **Protection against adverse selection**
Not only do ITG Algorithms offer superior access to the rich liquidity in POSIT, they also provide anti-gaming protection through ITG's proprietary Liquidity Filter.*

ABOUT ITG

ITG is an independent execution and research broker that partners with global portfolio managers and traders to provide unique data-driven insights throughout the investment process. From investment decision through settlement, ITG helps clients understand market trends, improve performance, mitigate risk, and navigate increasingly complex markets. ITG is headquartered in New York with offices in North America, Europe, and Asia Pacific.
