

# Design Studio

## Highly Productive System Design, Configuration and Maintenance Tools

**THE DESIGN STUDIO MODULE** optimizes the ability of stakeholders to intuitively design, configure and manage the Finys system.

The Design Studio provides an expanded range of people within an organization the flexibility to perform tasks that have traditionally been handled by IT savvy individuals with significant training. The end result is the rapid deployment of new products and the ability to make swift changes to existing lines of business.

### FEATURES INCLUDE:

- Intuitive and effective user interface
- Pre-built line of business templates
- Drag and drop field editing
- Real-time collaboration and screen design with key stakeholders
- Automated regression testing
- Automated data entry scripting
- Business rules management
- Microsoft Word based forms and print authoring
- Report wizard
- Pre-built interface repository
- Excel based rate maintenance
- User security administration down to the individual field level
