# Sapiens IDITSuite
## For Property & Casualty

## The Right Fit

Many property and casualty (P&C) providers are using legacy systems and/or multiple systems that aren't integrated and make it difficult to cope with today's formidable challenges in the non-life market. These challenges include complex and changing regulations, and empowered customers and agents who demand a digitised and unique experience.

Many existing systems weren't designed to solve the insurance industry's next-generation challenges. Non-life insurers require a solution that will enable them to showcase their market differentiators and focus on their core business strengths.

## Helping You Achieve Your Business Goals

**Sapiens IDITSuite** (formerly known as "Sapiens IDIT") is a component-based software solution suite designed for the P&C market that can be deployed modularly, integrating with your ecosystem's components. It is a highly customisable offering that includes policy administration, billing and claims, along with document management and workflow.

It enables carriers, managing general agents (MGAs) and brokers to meet critical and long-term business goals via traditional and digitised channels and operating models, including agents, direct insurance, bancassurance and digital channels.

Our suite was designed with growth and change in mind and is extendable and personalised to meet your unique circumstances – with extensive multi-company, multi-branding, multi-currency and multi-lingual capabilities.

IDITSuite's field-proven, modular components support all end-to-end core operations and processes for personal, commercial and specialty lines of business.

A product-centric application with advanced, online dashboards, IDITSuite offers a 360-degree customer and agent view, with drill-down capabilities to the individual and portfolio risk. IDITSuite also provides layers of flexibility, including a user-configurable workflow, contact management (CRM), configurable business rules and integration platform.

Our best-of-breed, pre-integrated, full lifecycle modules will enable carriers to achieve their short- and long-term business goals.

## Digital Transformation

Sapiens' P&C core is pre-integrated with our full digital suite, **Sapiens DigitalSuite**, which is comprised of **Digital Engagement** and **Digital Enablement and API Layer** components. DigitalSuite is a cloud-based solution that offers an end-to-end, holistic and seamless digital experience for P&C customers, agents, brokers, customer groups and third-party service providers.

## Fast Time to Market

IDITSuite's preconfigured content and service libraries will enable you to roll out new, innovative products quickly and consistently across all channels.

It was designed with a strong core and extendable customer/country layers, so that changes can be made quickly without touching the core. Our suite is flexible and can be configured by your business, as well as IT.

# Sapiens IDITSuite for Property & Casualty

## Omni-Channel Accessibility

IDITSuite is built on open technology and can be used across devices. We provide open, Service-Oriented Architecture (SOA) with a field-proven library of services that enable seamless integration of data to any external system/device, and a state-of-the-art, open technology base that communicates with all technologies and apps. IDITSuite and its mobile applications enable multi-channel distribution, ensuring that agents and customers are able to instantly access and process accurate data at any time and from anywhere.

The integration capabilities of Sapiens' portal (**Sapiens CustomerConnect**) allow customers to easily perform various self-service tasks. By enabling seamless integration between the back-office system and the portal, insurers can streamline and simplify their processes.

## Why Sapiens?

IDITSuite sets the standard for flexibility and speed to market. It will enable you to implement large-scale projects and benefit from proven delivery and best practices.

This flagship product has a proven track record of success at major P&C insurers globally.

Our long-term partnerships with our customers have yielded many best practices that will reduce your implementation time. We provide modern delivery methodologies and offer an advanced migration framework, a transparent pricing structure and a cloud-based hosting operating model.

## Reduce total cost of ownership via operational excellence

Out-of-the-box (yet extendable) business functionality, aggregation, simulation capabilities and analytics – combined with workflows and document management – result in increased productivity that lowers the total cost of ownership.

Sapiens offers our customers a clear roadmap that details our plans to continue enabling rich software functionalities and leading technology innovation.
