REGULATORY  
INTELLIGENCE**

  
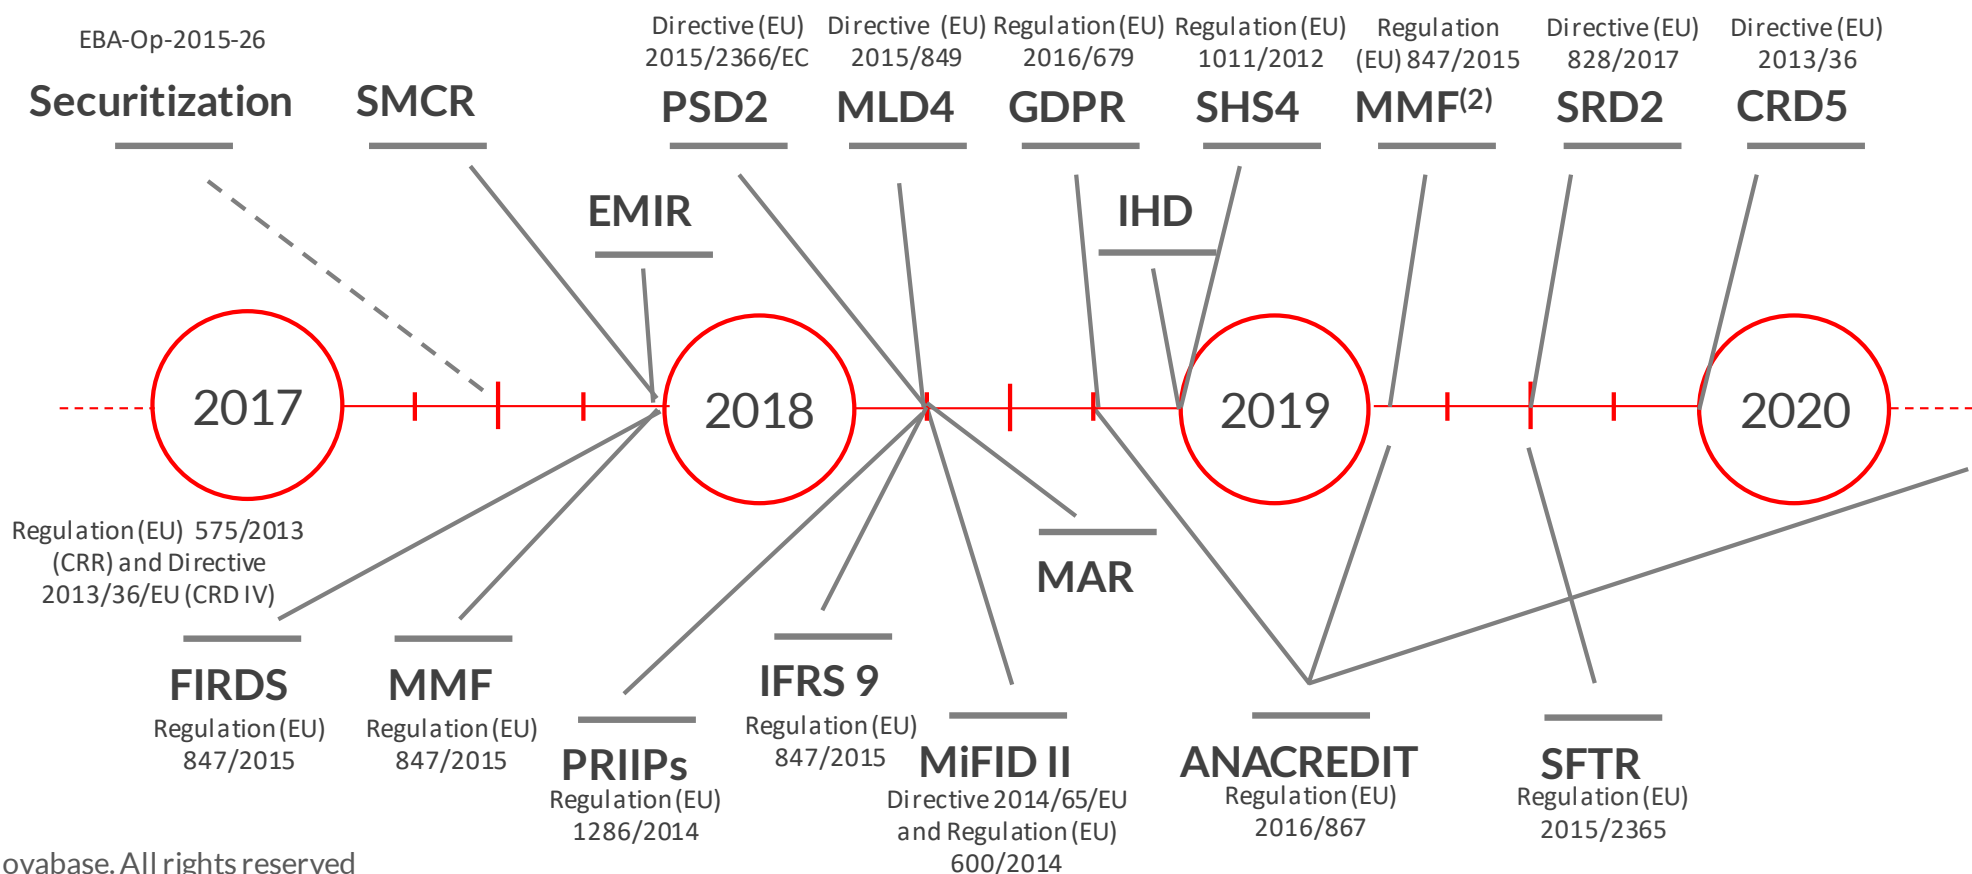

NOVABASE

**We now live in a  
compliance driven industry**

# Everyone must negotiate their way through a labyrinth of regulatory changes

# Regulatory overload

Thomson Reuters Regulatory Intelligence Feeds monitors regulators globally for changes to bank rules, and updates compliance teams three times a day with what's going on:

**+750**

REGULATORS  
GLOBALLY

makes directives overly  
difficult to keep up with

**185**

REGULATORY  
CHANGES / DAY

have to be dealt with  
by banks every day

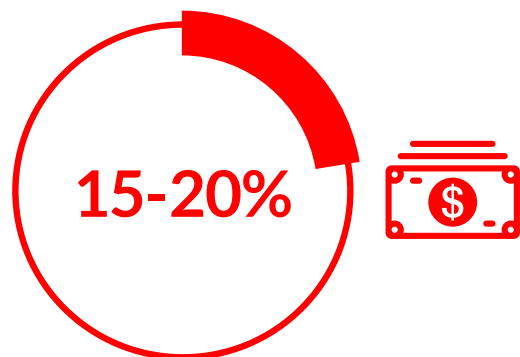

**12**

MINUTES /  
CHANGE

have to be interpreted  
and implemented

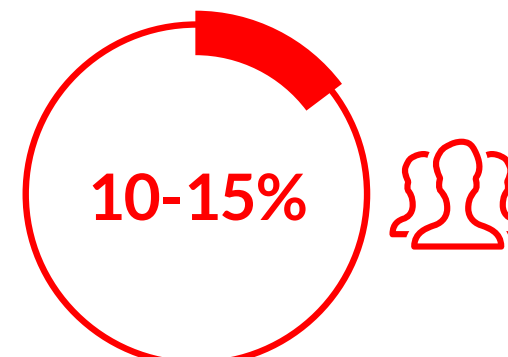

# Regulatory burden impact on Financial Institutions

## RUNNING COSTS

"We estimate that governance, risk and compliance (GRC) costs account for **15% to 20% of the total "run the bank" cost base** of most major banks. And GRC demand drives roughly 40% of costs for "change the bank" projects under way."

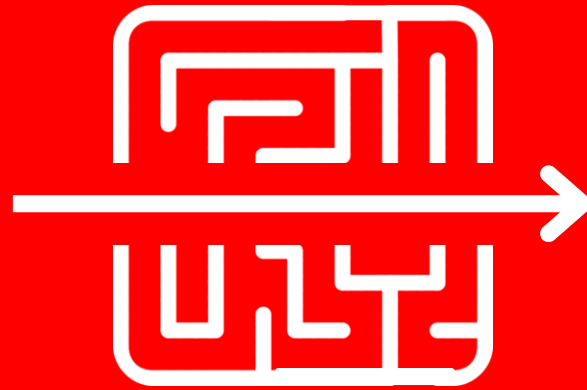

*Bain & Company*

## WORKFORCE

"... an estimate for financial institutions is now around **10-15% of total workforce** dedicated to governance, risk management and compliance"

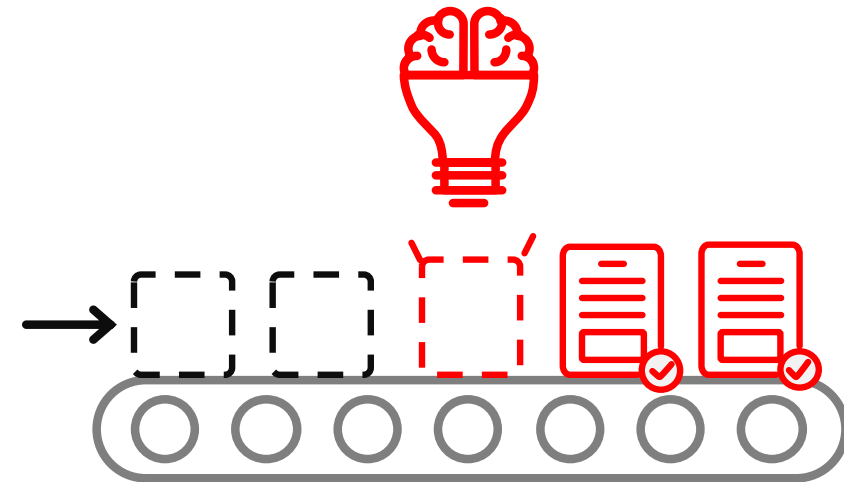

*BBVA Research*

# Streamline your regulatory intelligence

# Focus on growing your business

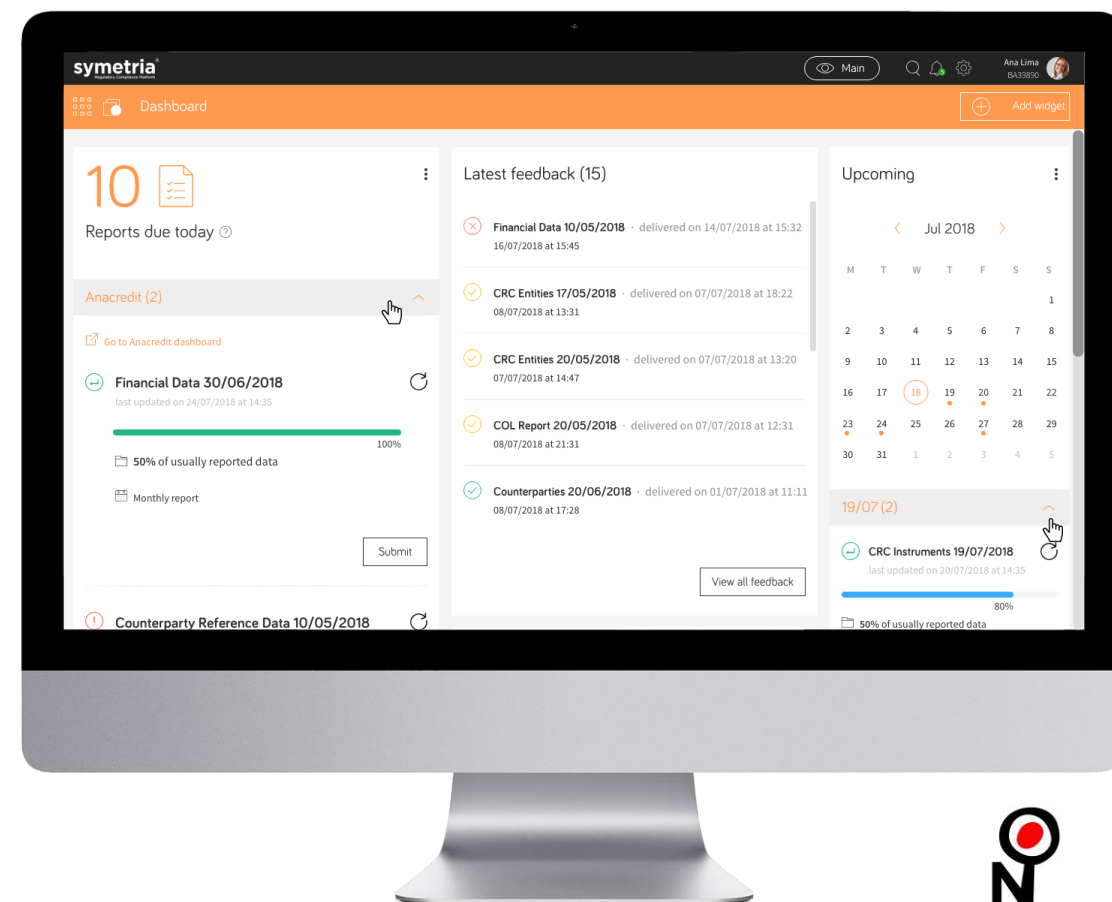

Seamlessly produce regulatory reports so you can save time on compliance and spend more on growing your business.

# Timely reporting made simple

When regulations change fast, you need to adapt quickly and efficiently.

Symetria<sup>®</sup> intelligently integrates data sources so you can provide timely, transparent information to regulators across multiple jurisdictions.

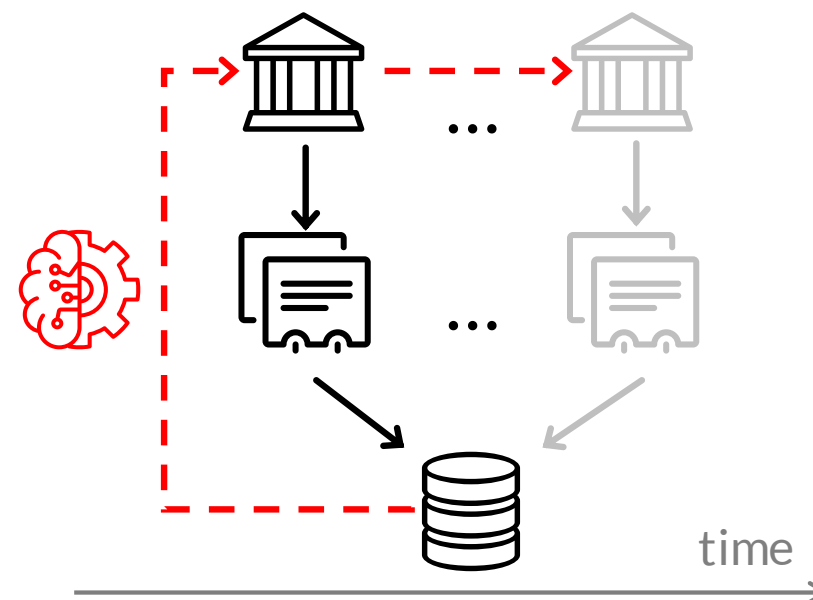

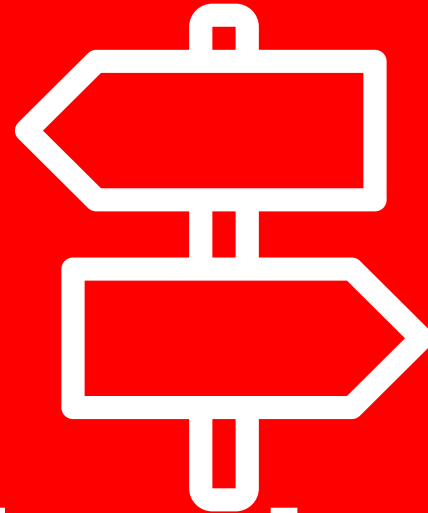

# Master the regulatory lifecycle

Proactive framework updates.  
AI-powered analytics. Strong  
validation and reconciliation.

Symetria<sup>®</sup> lets you tailor and scale things  
rapidly as the regulatory demands of your  
business evolve.

# A single solution for multiple scenarios

# Your solution. Period.

## Banks

Easily move your reporting methods to a cloud-based, enterprise solution that doesn't need heavy IT investment.

Help your business to meet complex national and international regulatory requirements without unnecessary data duplication and errors.

## Financial organizations

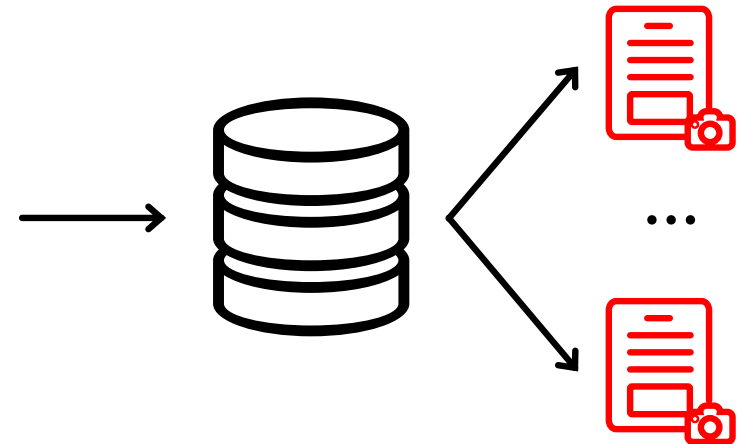

Improve reporting and speed up compliance with new regulations while reducing your spend on IT infrastructure.

Take better control of the entire reporting value chain by using centralised data to make better business decisions.

# Multiple regulations. One source of quality.

Symetria<sup>®</sup> centralises your relevant business data into one single repository.

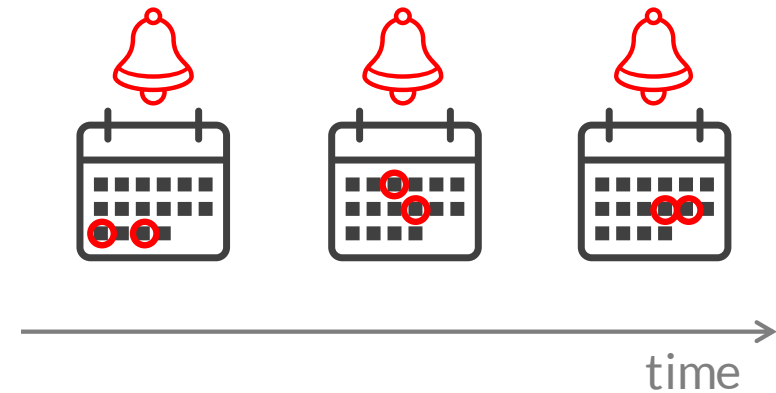

With flexible reporting set-up and a clean, source of in-depth data, you can easily deal with multiple regulatory frameworks simultaneously.

# Proactively manage risk

Take better control of operational risk using advanced analytics and cognitive powered modules.

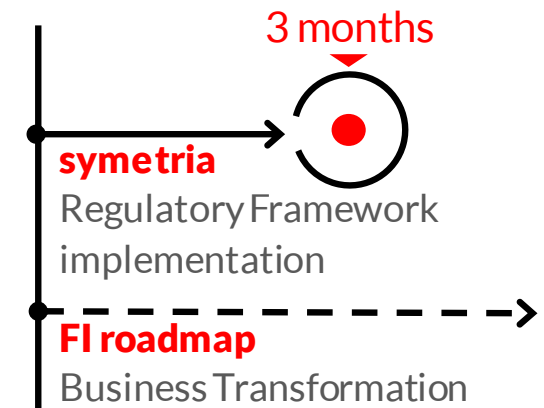

Symetria<sup>®</sup> lets you integrate regulatory calendars so you have insight into the compliance demands coming next.

# Best in class, in 3 months

Easy, seamless integration with existing processes and IT systems, means Symetria<sup>®</sup> can deliver results back to the business within 3 months.

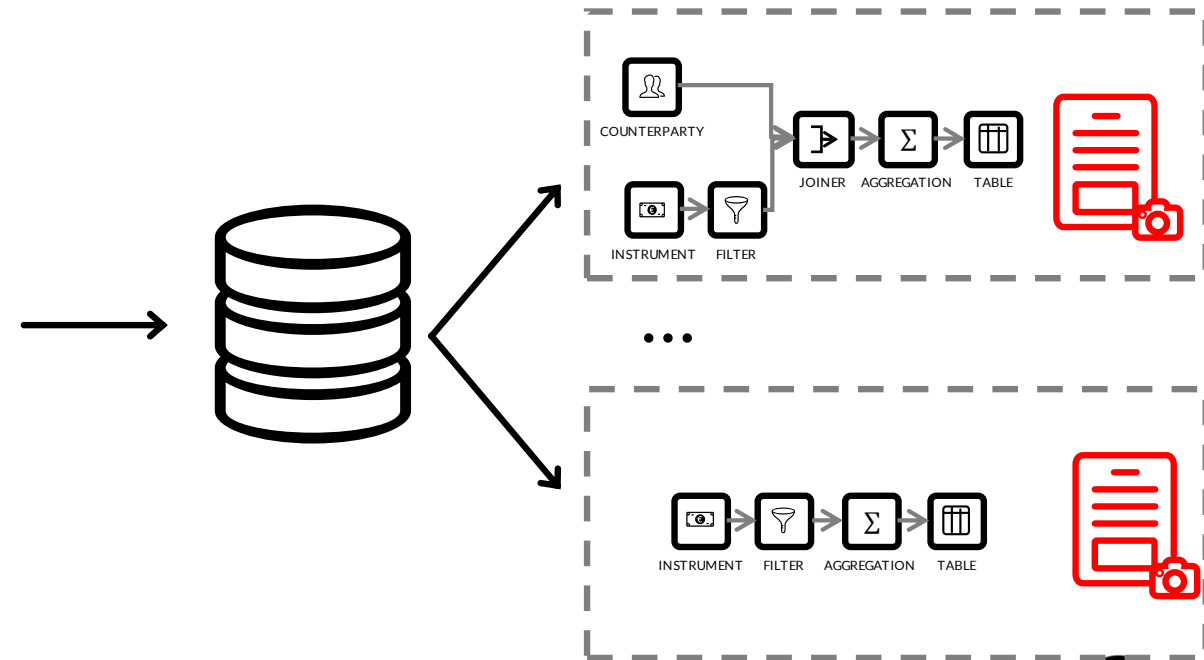

Everything is modular so you can install, configure and upgrade without interruptions to your service.

# Ready for future regulatory challenges

Pipelines and validations. Data lineage and drill-back functions.

Implement your regulatory frameworks using Symetria<sup>®</sup> and have analysis and insight at your fingertips to answer any potential future regulator enquiries.
